CAREER OBJECTIVE

Developer with operations and peer leadership experience seeks to provide automation capabilities to UKG's Site Reliability team.

I have a passion and experience for developing IaC and CasC automation for software and delivery pipelines.

Additionally, I have experience working with cross-functional stakeholders to ensure application delivery objectives are met and operational requirements are upheld.

EDUCATION

Bachelor of Arts - Political Science
Georgia State University
GPA: 3.5

EXPERIENCE

April 2019 - Present   **PDI Software**
